Summary

Computer Scientist with expertise in the MERN stack, Next.js, TypeScript, and Machine Learning, specializing in developing AI-integrated full-stack applications with a strong focus on performance and robustness. Passionate about cutting-edge technologies, writing clean, maintainable code, and leveraging Deep Learning, Generative AI, and Large Language Models (LLMs) to enhance software functionality, intelligence, and user experience.

Education

COMSATS University Islamabad

Bachelor of Science in Computer Science (Major in AI)

Lahore, Pakistan

2022 – 2026 (Expected)

Experience

Academic Developer & Researcher

Lahore, Pakistan

Student Projects

2022 – Present

- Collaborated with a team to develop a Zomato clone application using the MERN stack (MongoDB, Express, React, Node.js), implementing full user order flows.
- Developed a Library Management System in C to handle book inventory and user records.
- Implemented multiple Machine Learning models including House Price Prediction, Iris Species Classification, and Email Spam Detection using Python.
- Created Computer Vision assignments such as Traffic Light Color Recognition and Face Detection using OpenCV algorithms.

Projects

AI Assistant | *YOLOv8, Neural TTS, WebSockets* | [\[Link\]](#)

- Integrated a Lip-Synced 3D Avatar using WebSockets for low-latency, real-time visual feedback.
- Incorporated YOLOv8 for advanced object detection and Neural TTS for natural voice interaction, utilizing multithreading for concurrent performance.
- Implemented modular scripts to handle complex system automation commands and workflows.

AI Based Attendance System | *Python, OpenCV* | [\[Link\]](#)

- Developed an automated attendance system using computer vision to recognize faces in real-time.
- Utilized OpenCV and face_recognition libraries to accurately detect and verify student identities.
- Implemented automated data logging to record attendance timestamps directly into Excel/CSV formats.

Food App (Zomato Clone) | *React, Node.js, MongoDB* | [\[Link\]](#)

- Built a comprehensive food delivery web application replicating core Zomato features.
- Designed a responsive frontend with React and managed data persistence using MongoDB.

Email Spam Detection | *Python, Scikit-Learn* | [\[Link\]](#)

- Engineered a machine learning classifier to detect and filter spam emails with high accuracy.
- Performed data preprocessing and feature extraction on text datasets to train the model.

Technical Skills

Languages: Java, C, C++, JavaScript, Python

Technologies/Frameworks: MERN Stack (MongoDB, Express, React, Node.js), Three.js, OpenCV, YOLOv8

AI/ML: Machine Learning, Computer Vision, Generative AI, LLM Integrator, N8N, NumPy, SciPy, Pandas

Certifications

Machine Learning Specialization | *DeepLearning.AI* | [\[Link\]](#)

Supervised Machine Learning | *DeepLearning.AI* | [\[Link\]](#)

Unsupervised Learning, Recommenders | *DeepLearning.AI* | [\[Link\]](#)

Computer Networking (Cisco) | *Credly* | [\[Link\]](#)

Computer Vision with Python | *Udemy* | [\[Link\]](#)

AI & Deep Learning Certification | *Coursera* | [\[Link\]](#)
